Zinc Oxide

This electron micrograph displays a dense distribution of ZnO nanoparticles. The particles are predominantly spherical and vary in size, with many appearing to be in the range of 20-50 nm. They are set against a lighter, granular background. A scale bar in the bottom right corner indicates a length of 100 nm. Two labels are present: 'Zinc Oxide' in the top left and 'Fig. 16' in the top center.
